TITLE : VARIABLE SYMBOL DISPLAY DEVICE
FOR GAME MACHINE

ABSTRACT : PROBLEM TO BE SOLVED: To provide a game machine in which a symbol combining system is complicated to improve amusement of a game.

SOLUTION: Three symbol display parts 9a, 9b, 9c are provided in a variable symbol display device. The symbol display parts 9a, 9c at both side positions are composed of opaque strip tapes on which plural symbols are printed circularly applied to outer circumferential parts of reels. The symbol display part 9b at a center position is composed of a first symbol display body 20 comprising a reel of a little smaller diameter than those of the symbol display parts 9a, 9c disposed inside a second symbol display body 21 comprising a reel of the same diameter as those, transparent parts of such sizes as to correspond to one to three frames of symbols are opened at plural positions in an outer circumferential part of the second symbol display body 21, and opaque strip tapes on which plural symbols are printed are applied to the other parts.
